Project Title: CEDD Urban Soil Specification

CEDD 市區土壤規格

Project Abstract:

To completely review and revamp the General Specifications of Works now administered by Civil Engineering Development Department (CEDD) and adopted with or without modifications by various government departments engaged in the planting and management of urban greenery. The specific objectives are: (a) standardize the use and specifications of materials including but not limited to soil, soil conditioners, fertilizers etc; (b) revamp treatment procedures involving seed-bed preparation, soil screening and amendment, planting of trees, shrubs and grasses as well as on-site growth assessment; and (c) identify a set of soil and soil conditioners indicators appropriate to Hong Kong.
