Project Title: Shatin as a Cycling City

沙田單車城市的進一步發展研究

Project Abstract:

In recent years cycling has become an increasingly influential mode of transport especially in more developed countries. Aware of the benefits derived from cycling, the HKSAR Government has launched a number of projects in order to promote cycling in Hong Kong.

The overall objectives of this project are to (a) review the existing cycling activities in Shatin; (b) identify Shatin's strengths and limitations; and (c) provide recommendations for future cycling development.
