**Project Title: Consultancy Services for the District Aspiration Study (DAS) for Sham Shui Po District Council**

**Project Abstract:**

This research aims at gauging the vision of the future development of Sham Shui Po District. In order to have a better understanding of the public needs and aspirations towards urban renewal in Sham Shui Po District, a systematic qualitative survey will be adopted. The research therefore includes in-depth interviews, public forums and field study on various issues of urban renewal, in particular the 4R strategies. Data collected will be used to analyze the visions and stories of regular users of our selected "activity spaces" in the research area. Suggestions on how to improve living condition and quality of life through urban renewal will also be addressed in the District Aspiration Study Report.

In particular, the objectives of the study are: to solicit the residents' view on urban renewal; to adopt the qualitative research methodology in better understanding residents' aspiration on urban development; and to make recommendations on future redevelopment issues.
