**Project Title: To review the waste management of Tseung Kwan O and to examine its role in the development of Tsueng Kwan O towards a health city**

**Project Abstract:**

Hong Kong has been using landfills as the only means of disposal of municipal solid waste for decades. In order to create more landfill space, the HKSAR government proposed to extend the existing South Eastern New Territories Landfill at Tseung Kwan O. Because the potential impacts to the livelihood of TKO residents may be enormous, many complaints have been lodged by local residents and communities. Driven by the motive of enhancing the living quality of the neighborhood, CEPRM intends to review the waste management of TKO and to examine its role in the development of TKO towards a health city.
